Profile

I'm an extraordinary experienced Enterprise Architect, 2. line manager, database modeling expert, project manager, system designer and senior developer, who, through many years, has gained a lot of organizational, managerial, domain and system knowledge, enabling me to act as a professional advisor on all organizational levels and as a professional contributor in all tasks related to a company's transformation and development.

My technical expertise, combined with my analytical, managerial and interpersonal skills and my experience from several large Danish and international companies, gives me a unique profile for analyzing, designing and fulfillment of the organizational and system related changes in constantly changing environments.
